

Topic	Refraction and reflection of light	Level	Key Stage 3 and GCSE (or any other course for students aged 11-16)
Outcomes	To revise reflection, refraction and total internal reflection to move light around an obstacle course.		
Instructions	Students will need access to ray boxes and if using the sheet, enlarge to A3.		

Objects to use

You have to use at **least** three of the objects above to make the light source strike the target. If you succeed, try using total internal reflection to hit the target. Good luck!
